

# LEHMAN MANUFACTURING PRESENTS:

## MITY MITE ELITE

Due to our facility fire this past February, we have decided to make adjustments to improve our ceramic equipment. The **Mity Mite Elite** is our new version of the discontinued Mity Mite.

Noted improvements/advantages of the **Mity Mite Elite**:

- New cylinder-shaped tank with half gallon increment markings improves vortex action of your liquid
- New motor mount position allows for a sturdy work space
- Lifting and removing of motor becomes easier with the attached stainless steel motor handle
- New lid design rotates to offer approximately 40 square inches of available open pouring area or a complete closed position
- The addition of a tank fitting reduces any chance of leaking from faucet

**RETAILS  
AT \$530**
